

ABSTRACT OF THE DISCLOSURE

A photosensitive resin laminate comprising at least a support, an adhesive layer and a photosensitive resin layer,
5 wherein the photosensitive resin laminate shows a total light transmission of not less than 60%, or satisfies the following formula (1):

$$\{(A-B)/A\} \times 100 \leq 15 \quad (1)$$

wherein A is a total light transmission (%) of the support and
10 B is a total light transmission (%) of the photosensitive resin laminate.
